⁽¹⁾Accrued net income of farm operators from farm production. The seasonally adjusted data include an arbitrary smoothing of crop production, standard seasonal adjustments for live-stock items and a seasonal adjustment for earnings of the Canadian Wheat Board. Because of the arbitrary elements too precise an interpretation should not be given the seasonally adjusted figures for this item.

⁽²⁾This item differs from column 4, top of page 7, in that it excludes undistributed earnings (and the inventory valuation adjustment) of the Canadian Wheat Board.

12 Note.—These estimates are derived from a sample survey and are subject to sampling error. In general the smaller the estimate the larger is the relative sampling error. Newfoundland included in estimates from October, 1949. Annual data for 1952 are quarterly averages. The series are revised to include estimates relating to certain remote areas not covered in previous surveys. Source: Labour Force Bulletin, D.B.S.

34 *Estimates based on values of monthly sales, or shipments, as reported by a sample of manufacturing establishments. In industries where long-term contracts involve the receipt of progress payments, all such payments are treated as sales. The trend established for each industry is applied to the gross value of shipments universe for the industry from the Annual Census of Industry Survey.

Note.—The series on Unfilled Orders has been revised and a series on New Orders added.

⁽¹⁾Estimated total unfilled orders on books at end of month, irrespective of work done on them or of stocks from which they can be filled, but less progress receipts in industries working on long term contracts. Sales in these industries include progress receipts. Estimates are derived by inflating the monthly reported values to total for each industry on the basis of the estimated total values for each industry at the end of December, 1953. The latter were obtained from a survey of all manufacturing firms with a production value over \$50,000.

The sample of firms reporting monthly accounted for 75% of the total estimated Unfilled Orders Value in December, 1953. ⁽²⁾Total New Orders received during the period, at estimated selling values. The series covers total New Orders, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month (and also be reported as shipments in the month received) or whether they will be added to existing backlog.

Note: Newfoundland is included as of April, 1949, in data for wood pulp and newsprint.

⁽¹⁾Monthly totals are not equivalent to annual data which include Newfoundland and Yukon and North West Territories for which only annual statistics are collected. ⁽²⁾Total pulp production covers "screenings" which are already included in exports. "Screenings" are excluded throughout from mechanical and chemical pulp. ⁽³⁾Mill shipments destined for export.

Note.—These data are the results of a nation-wide survey carried out each month by the Bureau of Statistics with the co-operation of the Central Mortgage and Housing Corporation. All Metropolitan Areas and Urban Centres with a population of 5,000 or more are enumerated completely. Approximately 400 sample areas lying outside these municipalities are also chosen for complete enumeration.

⁽¹⁾The coverage was extended to 507 municipalities in 1948, and as of 1955, stands at 833, minor revision still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation.

⁽²⁾As of January, 1950, Newfoundland is included.

Note.—The classification of chartered bank assets and liabilities was revised by the Bank Act of 1954. Figures for the end of July, 1954, are on the new basis and, except for "Other Loans in Canada" adjustments have been made by the Bank of Canada to put figures for earlier dates on a comparable basis.

⁽¹⁾Prior to July, 1954, all figures in this section are daily averages. From July, 1954, Bank of Canada deposits are averages of the juridical days in the month shown while Bank of Canada notes and Canadian dollar deposit liabilities are averages of the 4 consecutive Wednesdays ending with the second last Wednesday in the previous month.

⁽²⁾From July, 1954, the figures are not adjusted for items in transit. ⁽³⁾Prior to July 1st, 1954, the statutory minimum requirement was 5 per cent for each day; since that date it has been a monthly average of 8 per cent. ⁽⁴⁾Mainly deposits of foreign banks. ⁽⁵⁾Including issues payable in foreign currency.

⁽⁶⁾Excluding Canadian day-to-day loans. ⁽⁷⁾Figures for June 30, 1954, and later, are not adjusted for items in transit and are not strictly comparable with those for earlier dates. The figure for June 30, 1954, after adjustment for items in transit, was 3,789. Source: Statistical Summary of Bank of Canada.

Note.—This series gives total new settled for ordinary insurance sales in Canada, exclusive of revivals, increases, dividend additions, reinsurance acquired and pension bonds without insurance. Totals are estimates projected from the sales reported by 29 companies operating in Canada representing 90 per cent of new ordinary insurance sales. *Monthly data for 1955 are not strictly comparable with those of 1954 due to several company changes in the manner of reporting new business. On a comparable basis, the Canada total in March, 1955 was 10% above that of March, 1954. Note.—The definition of profits before taxes is based mainly on the accounting definitions used by corporations. However, depletion charges are added back to net profits while Canadian dividends received are excluded from profits in order to avoid duplication. The term "profits" as used here means the total profits of all companies earning profits less the losses of all companies incurring losses. Estimates are based on profits as reported by a sample of all companies incorporated in Canada (excluding government-owned companies and incorporated co-operatives).

(1) Includes, in addition to the industries listed, Agriculture, Forestry, Fishing and Construction.

(2) Includes, in addition to the industries listed, Tobacco.

Rubber, Leather, Non-Metallic minerals, Petroleum and Coal and Miscellaneous Manufacturing Industries.

(3) Includes Printing and Publishing and Allied Industries.

(4) For 1953 and 1954, these totals do not equal the sum of the totals for the individual groups. It is estimated that total profits before taxes may exceed the sum of the groups by about \$11,000,000 per quarter in 1953 and \$14,000,000 per quarter in 1954. Although the totals have been adjusted by these amounts it is not possible at present to allocate the difference to the individual groups.
